Lester Snow
CalFed Executive Director
1416 9th Street, #1155
Sacramento CA 95814

Dear Lester Snow:

This letter is to urge you to adopt a CalFed plan which will:

1. Maximize water efficiency and conservation
2. Remove barrier dams, increase in-stream flows and acquire and restore habitat for fish and wildlife
3. Not rely on proposed dam raises or new off stream storage reservoirs

Please remember that restoration and conservation of rivers and streams which includes the removal of barrier dams is both fiscally and environmentally responsible. Further, CalFed's restoration program is intended to repair the damage caused by existing facilities and cannot be considered as mitigation or as an excuse to build new water projects.

Cover

Please write to me explaining the logic behind the construction of more dams and barriers. The rivers of California should not be sacrificed for the short term money interests of big business or politicians who want more money in their local pockets. Thank you for your time and consideration.

Sincerely,

Caephren McKenna
