The CALFED Bay-Delta Program welcomes your participation. Please use the space below for your written comments (attach additional sheets if necessary).

Comments:

More fresh water needs to flow through the Bay to restore habitat and the environment. It is essential that we implement more aggressive water conservation practices befor CALFED decides if it should build more dams and expand existing reservoirs. These actions will cost taxpayers money and further degrade the BAY-DELTA ecosystem.

Please invest in more wate efficiency before deciding to build new dams and expand reservoirs.
