AUG 0 9 1999

Lester Snow 7/31/99
Executive Director, CALFED
1416 Ninth St.
Sacramento, CA 95814

Please consider this letter in response to the revised CALFED plan. I strongly urge CALFED to expand water efficiency Conversation and reclamation programs to stretch our existing water supplies instead of building new dams & canals. This could be accomplished by switching to higher value and less water consumptive crops by installing water meters for agricultural and urban users.

I oppose CALFED's plan to increase Surface water storage in The Central Valley by raising existing dams or building new upstream storage reservoirs. CALFED's plan to raise Shasta dam would flood Segments of The upper Sacramento

and McCloud rivers. The proposed Sites offstream storage reservoir would require massive water diversions from the Sacramento River

We cannot solve the ecological problems caused by dams and diversions by building more dams & diversions.

Thank you for your time.

Sincerely,

Jennifer Jones
