AUG 1 9 1999 0196

Lester Snow
Executive Director, CALFED
1416 9th St, Sacto, CA 95814

Dear Mr. Snow,

I don't know a lot about water conservation and habitat, but I do know that in the race between water supply and population growth, growth cannot ultimately win.

The most important victory for me is to stop destroying habitat and wild waters, even if it's a question of letting the developers be damned.

Counting on you to know when enough is enough,

Dave Blake
