8/15/99

Dear Ms. Snow

I am writing to let you know I oppose CALFED's plan to build new dams or to raise the heights of existing dams. Doing this would flood parts of the Sacramento River and would destroy existing scenic areas.

I would like to urge CALFED to increase conservation measures and concentrate on more efficient use of the water and currently existing dams.

I strongly support CalFed's proposed restoration goals for the Central Valley. This includes the removal of archaic dams such as Englebright dam.

Sincerely,

Michelle Hannold
