Re: CalFed Surface Storage Projects

This letter is in response to the proposed CALFED PLAN.

I strongly feel we cannot solve the ecological problems caused by dams and diversions by building more dams and diversions. We can no longer compromise the ecological systems of California's rivers, compromises meant to help us maintain our quality of life, but only can damage the environment; subsequently, endangering our future quality of life. Short term fixes cannot solve long term problems. I hope to see more plans enacted that look beyond the present

PPC

to the generations that come.
I support CALFED's proposed restoration goals for the Central Valley, such as the removal of the Englebright Dam. These are the kind of plans that promote our continuing quality of life.

Thank you for your consideration on these issues. I look forward to hearing your position on them.

Sincerely,

Rebecca Kerley
