738

Hello - I write in concern for the current draft plan for SF Bay & Sacramento Delta. We need to implement environmentally & economically sound solutions, including conservation, pollution prevention & better management of groundwater & watersheds.

Please do not build any new dams, reservoirs or canals during Stage 1. Instead fund projects to =

1. improve water quality by preventing pollution
2. groundwater storage & management
3. restoring the rivers, bays & wildlife habitats
4. guaranteeing increased fresh water flows -

Lets Restore our Bay & delta
