Lester Snow
Exec. Director, CALFED
1416 N. 10th St.
Sacramento, CA. 95814

Dear Mr. Snow,

I am writing in response to the revised CALFED plan.

Focus on the problem. Diminishing resources pitted against ever-increasing demand. Demand that is fueled by inefficiency and plain-old greed – Not need.

More dams, larger water storage just delay the ~~[illegible]~~ eventual conclusion that we cannot sustain the "wrong" types of crops and rampant excess in the valley; Meanwhile, the destruction to our ever-disappearing rivers and streams is immediate.

Please help us.

Sincerely,
David Sandshower
