9/10/99

Mr Snow,

I urge you to halt CALFED's plan to increase water storage in the Central Valley. It would increase the harmful process of diverting water from the Sacramento River.

We have enough dams in California. CALFED needs uncover alternative, ecological ways to accomplish it's important missions.

CALFED is taking some positive steps (removal of the Englebright dam, etc) and I urge you to continue on this path.

Please respond at the below address w/ an update of CALFED plans.

Sincerely, Christopher W. Daley
