Lester Snow August 28, 1999

Executive Director, CALFED

1416 Ninth St

Sacramento, CA 95814

Dear Mr Snow

I urge CALFED to expand water conservation programs to extend our existing water supplies. This could be done by installing water meters for all users and switching to less water consumptive crops.

I oppose CALFED's plan to increase surface water storage in the central valley by raising existing dams or building new reservoirs.

I support CALFED's proposed restoration goals for the Central Valley.

Thank-you for your consideration

Barbara Smith
