Aug 28, 1999

Dear Mr. Snow,

Please consider this letter a response to revised CalFed plans.

I oppose raising existing dams or building new off stream storage.

I urge CalFed to expand water efficiency, conservation & reclamation programs in an attempt to utilize our existing water supplies more efficiently — spread the wealth — so to speak.

852(2)

Growing high water consumptive crops would be monitored, for example.

I support restoration goals for the Central Valley.

I'm strongly opposed to building more dams & diversions

I thank you for your attention in this matter and look forward to hearing your position on this issue.

Sincerely,
Judith Sanders
