Dear Mr. Snow:

I am writing this letter while standing on the river bank look at the american river. I am river rafting with Friends on the River & was discussing the CALFED plan. I oppose CALFED'S plan to increase surface water storage in Central Valley by raising existing dams or building new off stream storage reservoirs.

I support CALFED'S proposed restoration goal, including removing some facilities such as the Englebright dam, that act as barriers to migrating salmon, acquiring important

riparian habitat, & increasing instream flows for fish, wildlife & recreation.

We can NOT solve the ecological problems caused by dams and diversions, by building more dams & diversions.

I would like a response on how CALFED will protect the animals, environment, and water which can NOT help themselves.

Thank you for your support and consideration
