Dear Executive Director Snow,

Please enter these comments into the formal record for your Draft Programmatic Environmental Impact Report. The CALFED Bay/Delta program must be revised:

1) No more dam building!
2) Make serious investments in water conservation, groundwater management, & pollution prevention.
3) Restore our rivers, bays, & fisheries – we need guarantees of fresh water flows & care for the land around the rivers (Soil erosion is a big issue!)

The salmon need help! You can provide that help! I look forward to your response.

Sincerely,
Joanne Orengo
